PROFILE SUMMARY

Final-year B-Tech CSE (AIML) student with a strong foundation in DBMS, SQL, and object-oriented programming concepts. Experienced in working with structured data, basic data analysis, reporting, and problem-solving through academic projects. Comfortable understanding business workflows, ensuring data accuracy, and translating technical concepts into clear and simple explanations. Quick learner with strong analytical and communication skills, eager to start a career in the technology domain and contribute to data-driven and process-oriented solutions.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib), SQL, Java, C
Visualization: Power BI (DAX, Data Modeling, Power Query)
Data Analysis Techniques: Exploratory Data Analysis (EDA), Data Cleaning, KPI Tracking
Database: MySQL
Tools & Platforms: MS Excel (Pivot Tables, XLOOKUP, Power Query), Git, GitHub
Core Concepts: ETL Processes, Data Transformation, Dashboard Development

INTERNSHIP

Techno Exponent – Data Science Intern Aug 2025 – Nov 2025

- Contributed to FraudShield AI project focused on detecting financial transaction anomalies.
- Applied Python for data preprocessing, exploratory analysis, and machine learning workflow implementation.
- Strengthened analytical thinking and structured problem-solving skills using real-world datasets.

PROJECTS

Executive Sales & Profitability Dashboard Jan 2026
Power BI, SQL, Power Query, Excel

- **Architected** an interactive executive-level Power BI dashboard analyzing retail sales, regional profitability, and discount impact using dynamic KPIs, drill-through reports, and geographic visualizations.
- Built an **end-to-end ETL pipeline** by cleaning raw CSV data in Excel, transforming datasets using Power Query, and validating business logic with optimized MySQL queries.
- Identified the **critical discount threshold** where margins turned negative, delivering data-driven pricing insights to improve profitability visibility.

Interactive Mobile Sales Intelligence Dashboard Mar 2026
Power BI, DAX, Data Modeling [**GitHub**]

- **Developed** an interactive Power BI dashboard analyzing mobile sales performance across cities, brands, and payment methods.
- Created dynamic KPIs including **total sales, total transactions, quantity sold, and average sales value** using DAX measures.
- Designed visualizations such as **city-wise sales maps, monthly sales trends, brand analysis, and payment distribution charts**.

EDUCATION

Brainware University, Barasat Aug 2022 – May 2026 (Expected)
B.Tech in Computer Science and Engineering – CGPA : 8.12 (83.13%)

Sundarban Janakalyan Sangha Vidyaniketan 2020 – 2022
Higher Secondary — 90.8%

Dhablat Lakshman Parabesh High School 2020
Secondary — 74.8%

HOBBIES

Watching movies, Playing indoor games
